

Home made Electrolyzed Disinfectant Sprayer

Water + Salt \rightarrow HClO Acid

Is HClO Safe?

HClO is a weak acid of pH about 6.0 ~7.0. Unlike Chlorine bleach, it is 100% safe and non-irritant. It is much more efficient at killing microbial pathogens than chlorine bleach. It is ideal for home, office, kitchen, washroom & etc. to sterilize and remove odor.

Sterilizing rate 99.99%

360° spray gun head
Press lightly
Water is spewing out.

Product Specification

Color:	White
Cycle Time:	8 minutes
Power:	5 V / 1 A (USB)
Product Volume:	300 ml
Product weight:	0.35 Kg
Package Size:	272*84*143mm

Sanitizing HClO Concentration

Solution Concentration	Disinfection Objects or Purposes
Low	Fruits, Vegetables, eggs, foods, skins, Hands. 
Medium	Kitchen ware, Toys, Towels, Clothes, Bed sheet and covers, Surface cleaning agents 
High	Working clothes, Surgical masks, Haircut Utensils, Epidemic areas, Bacterial contaminated equipment 

- * Low concentration: 1.0g – about 1 spoon
Medium concentration: 2.0g – about 2 spoon
High concentration: 3.0 g – about 3 spoons

Application Method

One-key to turn on the disinfectant water generation mode.

- 1) Pull in 300ml tap water and add in the amount of salt by the spoon provided for the desired sanitizing solution concentration *.
- 2) Turn the nozzle to shut position and well shake the bottle to dissolve the salt.
- 3) Plug in the USB for having a power of 5V/ 1A.
- 4) Press the On button at the bottom. The light is on during electrolysis process. When the light is off, it means the operation is completed.
- 5) Unplug the USB and the electrolyzed water is ready too use.
